1st Blessed Birthday for Above All

Products and services

Judy and Neven supporting their mom all the way

Plasterboards

Gypsum Plasterboards consist of an aerated gypsum core encased in and firmly bonded on both sides with special plasterboard liner rendering a smooth yet highly functional surface.

Special characteristics of gypsum provide the outstanding advantages over other flat sheet materials.

Gypsum Plasterboard is conventionally used in the construction of Drywall Partitions, Demountable Partitions and Flush Plaster Ceilings.

Pelican System stocks a vast range of gypsum boards that caters for both commercial and residential applications.

Jumbo Standard Plasterboards are exceptionally versatile and lightweight.

They can be used for domestic and commercial ceiling applications as well as walling/partitioning applications.

Jumbo Plasterboard is also used to make prefabricated bulkheads, curved ceilings (barrel), radiused walls among other innovative applications. It is a durable, versatile product that is clean and recyclable.

With products to suit each and every need Above All are leaders in the field

Happy 1st Birthday

May you be blessed in your business from here onwards!
